

## Universal Modular Patch Panel

### Applications

Vericom Modular Patch Panels are generally mounted to 19" racks, wall mount brackets, and cabinets in the telecommunications room. The patch panel provides an interface between the horizontal cable and active electronics like switches in the telco room.

### Description / Specifications

The modular patch panels are a powder-coated, stamped metal panel with write-on labels. The panel accepts standard keystone modules including but not limited to Cat 5e, 6, 6A modules, HDMI, fiber optics, RCA modules, coax connectors, and more. Modular patch panels are available in a 24 port 1 RU (rack unit) configuration. The panel mounts to all standard 19" racks, cabinets, and wall mount brackets.

### Ordering Information

Description		
Universal Modular Patch Panel- Unloaded		
Item Number	No. of Ports	Rack Unit Quantity
MPPKU-04040	24	1RU

### Features & Benefits

- Accepts all standard keystone modules
- Frame Material: SPCC
- Write-on labels provided to support labeling requirements
- Modules can be removed for future upgrades and MACs
- Available in 24 ports (1RU) or 1.75" tall

### Standards Compliance

- Keystone Standard Ports
- EIA-310-D
