

Sliding Shelf

Description

This product is designed to conveniently slide out of the cabinet or rack for easy access to non-rack mountable equipment, while the low profile design only requires 1U. Our sliding shelf features ventilation holes to keep equipment running cool, and locking slide rails to prevent the shelving from sliding completely out of the cabinet. This shelf offers an adjustable mounting depth from 24" to 34" and is compatible with all Vericom network and server cabinets.
