Description

This side panel for VC5 Network and Server Cabinets provides a simple and convenient solution for routing cables between adjacent cabinets, eliminating the need to run them above or below. Each side panel includes (4) 4"W x 8"H openings that provide access in two different vertical locations and at the front and back of the cabinet, while each pass-through opening includes a steel cover plate to seal up the opening when not in use.

Key Features

- Each side panel includes a keyed slam lock for securing the panel to the cabinet
- Fasteners for steel cover plates are located on the inside for increased security
- Solid steel cover plates are available if a pass-through opening will not be used
- Available for 42U, 45U, and 48U x 42" or 48" deep VC5 cabinets
