

Viaduct Cable Manager

Description

Vericom's Viaduct Cable Manager delivers performance in a user-friendly design, providing a solution that is both convenient and highly functional. Columns of plastic fingers with smooth, rounded edges allow cable bundles to enter or exit anywhere along the vertical edge, while the lockable and removable dual-hinged door provides an additional level of protection and security.

Viaduct Cable Managers offer seamless integration with Vericom 2 and 4 post racks and can be connected back-to-back to form a double-sided vertical cable manager.
