# VERICOM®

Viaduct Cable Management Spools

2.5" Diameter

1" Diameter

In Use

Description

Viaduct Cable Management Spools provide strain relief and slack management for both copper and fiber patch cords inside a Viaduct Vertical Cable Manager. The 2.5" diameter spool provides a 1.25" bend radius for optimum data transmission, while the 1" diameter spool helps organize, support, and route cable bundles as they enter/exit the cable manager.

Features & Benefits

- **Each kit includes 3 sets of spools and installations screws**
- **6" long with removable cap for easy cable routing**
- **Attaches to the back panel of Viaduct Vertical Cable Managers**
