

Horizontal 90° Elbow

Description

This horizontal bend ladder is used to create a 90 degree sweep in the horizontal plane for cable ladder runway and is designed to conform with minimum cable bend radius requirements. Our horizontal bend ladder consists of 1-1/2 x 3/8 x 0.060 wall steel tube sides with 1.00 x 1/2 wall tube steel rungs. Installs easily using butt-splice kits.
