

Category 5e RJ45 Clear Connectors- Shielded

Features & Benefits

- Suitable for CAT5e shielded installations
- Shielded to reduce EMI
- Terminates 24-26 AWG stranded or solid conductors
- High-impact clear polycarbonate plugs
- Gold plated contacts
- Packaging: Bag of 50

Construction

**Body Material:** Polycarbonate  
**Shield Material:** Nickel Plated Steel  
**Contact Material:** Gold Plated Brass

Mechanical

**Wire Compatibility:** 24 - 26 AWG Solid or Stranded  
**Insulation Resistance:** Min 1000 megaohms  
**Standing Voltage:** 1000V AC/ minute  
**Mating Life Cycle:** Min 1000 cycles

Applications

These Category 5e Shielded RJ45 connectors are used for crimping and terminating Gigabit Ethernet Cables when a shielded connection is preferred. This plug is suitable for use with shielded Category 5e cable.

Description / Specifications

These RJ45 shielded connectors are composed of a polycarbonate material body, with a nickel plated steel shield and gold plated contacts. These connectors are suitable for use with shielded Category 5e 24 - 26 AWG solid and stranded conductors. These connectors are available in a bag of 50.

Pair with our modular plug tool (Item # WTRJC-03632) for simple, quick and easy repeatable terminations.
