

Category 6 RJ45 Clear Connectors- Shielded

Features & Benefits

- Suitable for CAT6 shielded installations
- Shielded to reduce EMI
- Terminates 22-24 AWG stranded or solid conductors
- High-impact clear polycarbonate plugs
- Gold plated contacts
- Packaging: Bag of 50

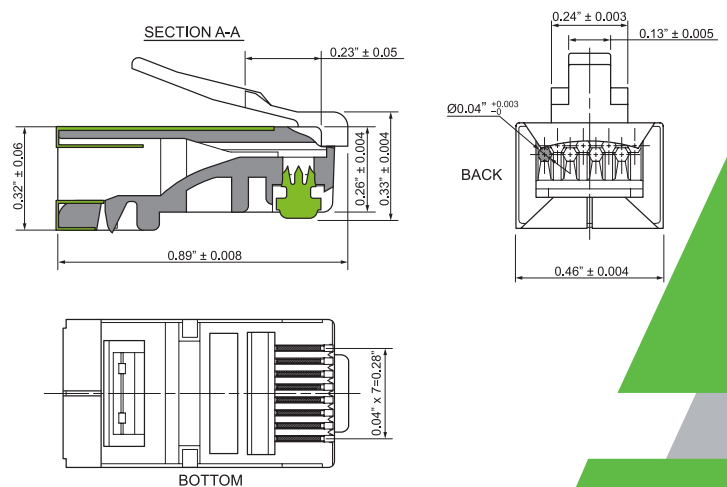

Construction

Body Material: Polycarbonate
Shield Material: Nickel Plated Steel
Contact Material: Gold Plated Brass

Mechanical

Wire Compatibility: 22 - 24 AWG Solid or Stranded
Insulation Resistance: Min 1000 megaohms
Standing Voltage: 1000V AC/ minute
Mating Life Cycle: Min 1000 cycles

Technical Illustration

Applications

These Category 6 Shielded RJ45 connectors are used for crimping and terminating Gigabit Ethernet Cables when a shielded connection is preferred. This plug is suitable for use with shielded Category 6 cable.

Description / Specifications

These RJ45 shielded connectors are composed of a polycarbonate material body, with a nickel plated steel shield and gold plated contacts. These connectors are suitable for use with shielded Category 6 22 - 24 AWG solid and stranded conductors. These connectors are available in a bag of 50.

Pair with our modular plug tool (Item # WTRJC-03632) for simple, quick and easy repeatable terminations.
